Vitosol solar collectors: now with 5 year warranty

In under 4 hours, the sun provides more energy than is consumed by the world's population in a year – and all for free. Per year an average of 1000kWh of solar energy reaches each square meter of the UK – the equivalent energy of 100 litres of oil.

Viessmann solar systems allow you to capture this energy and in turn save up to 60% of your hot water heating costs.

Viessmann Vitosol solar collectors are manufactured using the highest performing materials and most advanced production techniques.

The result is exceptionally high quality solar collectors giving efficient operation and long term reliability.

5 year warranty

Viessmann are confident that your solar system will return trouble-free and cost-saving operation for many years.

Consequently all Viessmann solar collectors, both the flat panels and the evacuated tube systems are guaranteed for 5 years against material and manufacturing defects.

Terms and conditions

The extended 5 year warranty applies to the Vitosol 200-F, Vitosol 200-T and Vitosol 300-T ranges of solar collectors.

- The 5 year warranty is applicable for all solar collectors delivered after the 1st January 2009 and commences from the date of delivery of the collector
- The warranty will apply to defects in the collector only and excludes defects in the roof fixing equipment, connection pipes, sensors and any other Viessmann equipment.
Note: all other Viessmann accessories or solar equipment, for example the roof fixing equipment, solar pump, controller, expansion vessel, etc will carry the standard 2 year warranty from the date of delivery
- The warranty does not cover:
damage resulting from improper assembly or installation;
damage arising out of improper operation of the equipment;
damage due to failure of the solar heating medium;
damage resulting from mechanical stresses imposed on the collector by the building or framework to which it is fixed;
damage resulting from adverse weather related influences
- The warranty covers replacement or repair of the solar collector, its fitting and reinstatement of the solar system
- The warranty of any collector replaced or repaired under the terms of the 5 year warranty expires when the warranty on the original product expires
- Viessmann or its representative must be given the opportunity to check any claims on site immediately after any defect occurred
- Installation must have been carried out by a competent person/company (heating contractor or plumber) following the version of Viessmann installation instructions, schematics and technical guidelines in force at the time
- The warranty is dependent on the use of the appropriate Viessmann solar heating medium in the solar collector fluid circuit
- Confirmation must be provided that the system was installed and commissioned in line with Viessmann recommendations and that the system has been regularly inspected and checked and routine annual maintenance has been carried out by a person/company competent for this purpose
- For further information please see Viessmann Limited's Terms and Conditions of Sale
